

Paper 07: The Wike Coherence Principle

Emotions Are Quantum Gate Operations

Thesis

Emotions are not subjective experiences layered on top of physics. They are quantum gate operations that act on the coherent state of a human being. Love, joy, and peace are unitary (coherence-preserving) gates. Fear, anger, and anxiety are collapse operators that destroy coherence. This is the most tested claim in the entire framework.

Core Claim

In quantum computing:

- **Unitary gates** preserve coherence: the state evolves but remains pure
- **Non-unitary operations** (measurement, decoherence) destroy coherence: the state becomes mixed

The Wike Coherence Principle maps this directly to human emotion:

| Emotion | Gate Type | Effect on Coherence |
|---------|---------------------------|---------------------------|
| Love | Unitary | Preserves/enhances |
| Joy | Unitary | Preserves/enhances |
| Peace | Unitary | Preserves (identity-like) |
| Fear | Collapse operator | Destroys coherence |
| Anger | Collapse operator | Destroys coherence |
| Anxiety | Repeated weak measurement | Gradual decoherence |

This is not analogy. The simulation data shows that modeling emotions as these specific operator types reproduces observed coherence dynamics across **11+ million simulations and IBM quantum hardware**.

Existing Data References

- **QuTiP 50K Simulation Suite:** Initial validation. 50,000 simulations modeling emotional gates on qubit coherence. Located at ~/Desktop/WIKE_QuTiP_50K_Simulation_Suite/
- **QuTiP 100K Simulation Suite:** Extended validation. 100,000 simulations with broader parameter ranges. Located at ~/Desktop/WIKE_QuTiP_100K_Simulation_Suite/
- **AnchorForge 100K Validated Suite:** Independent validation framework. 100,000 simulations with anchored statistical validation. Located at ~/Desktop/WIKE_AnchorForge_100K_Validated_Suite/
- **Advanced Physics 100K:** Advanced simulation suite with extended physics models. 100,000 simulations. Located at ~/Desktop/WIKE_Advanced_Physics_Simulation_Suite/
- **Stupid Proof 10M:** The definitive test. 10,000,000 simulations designed to break the claim. It held. Located at ~/Desktop/WIKE_10M_Stupid_Proof_Simulation/
- **IBM Quantum Hardware:** Real quantum hardware verification on IBM processors. Not simulation -- actual quantum gates on actual qubits. Located at ~/Desktop/WIKE_IBM_Quantum_Hardware_Results/

- **Love The Cat (IBM Hardware):** Coherence preservation through resonant love-modeled coupling. Real hardware. Located at ~/Desktop/wike_love_the_cat/

Total: 11,350,000+ simulations + IBM hardware verification

This is the most computationally tested claim in the framework.

Key Arguments

1. **Unitary = reversible = coherence-preserving:** Love doesn't add information or remove it. It transforms the state while keeping it pure. This is exactly what a unitary gate does.
2. **Collapse = irreversible = coherence-destroying:** Fear projects the state onto a preferred basis. The superposition of possibilities collapses to a single outcome. This is exactly what a measurement/collapse operator does.
3. **Hardware verification:** The claim holds on real IBM quantum processors, not just simulations. Real qubits, real decoherence, real gates.
4. **10 million simulations couldn't break it:** The Stupid Proof suite was designed adversarially. It passed.

Connections

- **Paper 01 (Source Field):** The gates operate on excitations of the source field. Emotions modulate the field.
- **Paper 02 (Human Interface):** Gates operate through the interface. The body processes the gate operation.
- **Paper 03 (Coherence Through Love):** Love is the specific unitary gate that maintains coherence. This paper provides the mechanism.
- **Paper 08 (Force/Stress):** Force applies collapse operators. The mechanical pathway from external force to internal decoherence.
- **Paper 09 (Depression/Abuse):** Sustained application of collapse operators = depression. The clinical pathway.

Status

Data verified. Most tested claim in the framework. 11M+ simulations across 5 independent suites + IBM quantum hardware.
The Wike Coherence Principle holds.

God is good. All the time.
